

PRODUCTS: ILLUMINATORS

ILLUMINATORS

Visual Aquatics fiber optic lighting systems are safe and affordable. Our fiber optic lighting systems offer you the same lamp technology you find in many luxury cars today. Visual Aquatics offers the utmost quality in manufacturing, engineering and safety.

We offer synchronized fiber optic units for multiple light installations. We also have the ability to combine our exclusive line of fiber optics with our LED light. Run the two systems independently for a dramatic, multi-colored effect or synchronize them to enjoy the full ambiance of each color. Add Water Features for an even more impressive creation.

6004 AND 6004-AS

CONSTRUCTION

Case: High Impact Polycarbonate
 Ventilation: 110 cu ft/min air volume
 Acoustic rating: 50dB(A)
 Weight: 20 lbs.

ELECTRICAL

Voltage required: 120VAC 60Hz
 Power consumption: 200 Watts max
 Start current load: 4.4 amps
 Current usage: 1.8 amps

LAMP

Type: Metal-Halide, proprietary design
 Lamp life: 6000 hrs average
 Cool down restrike period: 3 minutes
 Replacement p/n: Y20-6000

6006 AND 6000-AS

1000 FIBER CAPACITY - 6 COLOR COLOR WHEELS

AUTO SYNC MODEL ALSO AVAILABLE WHEN MULTIPLE LIGHT SOURCES ARE NEEDED
