

ABOUT IMPACT LIGHTING INC.

Impact Lighting Inc. is a manufacturer, distributor and installer of Fiber Optic and LED lighting products for the commercial and residential markets around the world. With over forty years of combined experience Impact Lighting Inc. is the most experienced company in the world in the field of Fiber Optic and LED lighting.

We provide cost effective optical design and evaluation expertise to a client base which demands value.

Our capabilities also include Optical Design support for:

- Imaging Systems
- Lighting / Illustrations
- LED Optics and Systems
- Optical Fiber Applications

MANUFACTURING

Impact Lighting Inc. is one of the most unique product manufacturing companies in the world. We specialize in developing and manufacturing a large array of specialty lighting and non lighting products. With a team that consists of design engineers, mechanical engineers, electrical engineers, inventors, installers and resource specialists we are one of the few Lighting companies that still manufacture 75% of our products in the USA.

We manufacture and stock standard products like our GALAXY DOME™, GALAXY STAR PANELS™, VISUAL BUBBLE WALLS™, GALAXY SHELVES™ and much more. Our capabilities include Injection Molding, Extrusion, CNC routing table, CNC Machining, Electronic Pick and Place Machine and Soldering stations.

With our Just in Time (JIT) Inventory System we are one of the few manufacturers that put suppliers right into our assembly lines.

We have a full Plastic Fabrication division which lets us make innovative light fixtures quickly. To read more about our product development capabilities please go to OEM or our Product Development sections.

DISTRIBUTOR

Impact Lighting Inc. Distributes the finest products in the world. We provide our customers with the latest lighting innovation. With our quality control division, Impact Lighting

Inc. tests every product before introducing it to the market.

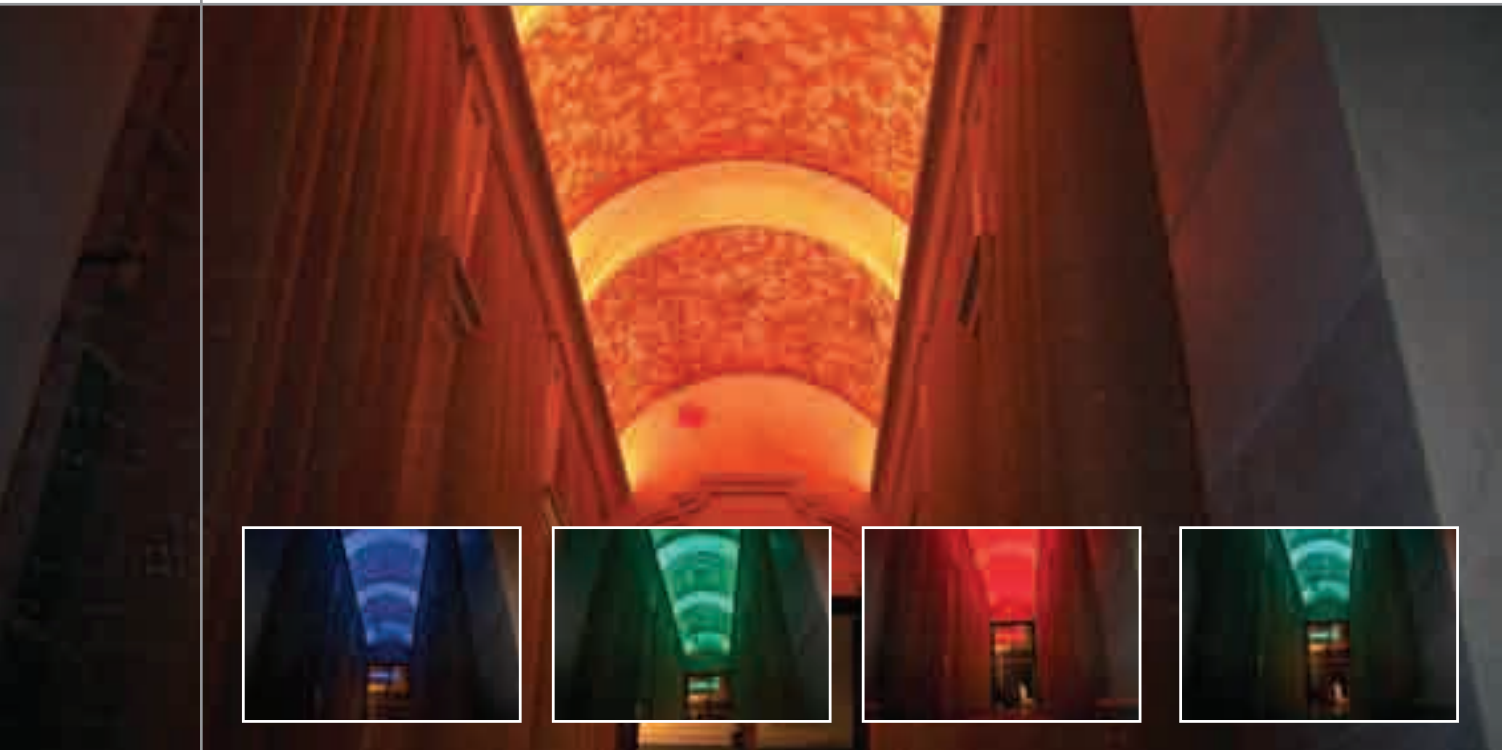

Impact Lighting Inc. is proud to have partnered with leading lighting manufacturers around the globe to provide and ensure our customers with a variety of innovative technologies and other products that are yet to be seen in the marketplace.

INSTALLER

Founded in 1997 Impact Lighting Inc. was formed as a result of a need for quality installations of Fiber Optic and LED lighting around the world.

Over the years the Impact Lighting team was involved in the designing, fabricating, manufacturing and installing from the largest Fiber Optic projects in the world such as the Fiber Optic Coca Cola bottle in New York's Time Square, The SPECTRO Parade for Walt Disney World in Orlando Florida, 250 room Star Ceilings for a Children Hospital in California to projects as small as Star ceilings for children's bedrooms and Home theaters.

Our company has done many custom projects such as installing Fiber Optics and LED components into carpets, clothing and other exotic materials. Impact Lighting Inc. has a network of Factory representatives, Distributors and Installers all over the world. It is a partnership that has worked for many years. We provide business tools to start, maintain and grow your business. Your company will also have the benefit of our knowledge and experience.

O. E. M.

Through our manufacturing divisions, Impact Lighting Inc. design and engineering team can source out custom designs as well as develop products for your specific needs.

IMPACT LIGHTING DESIGN AND FABRICATION

Impact Lighting Design is a custom fabrication division where we have the capabilities to produce custom designs with the exact requirements for your lighting needs. A few examples of our custom fabrication products include; handrails, sconces, bubble walls, shelves, and architectural lighting products. We also provide our customers with an array of graphic design opportunities in order to improve their business and corporate identity through web and print design using the latest Adobe software products.

Our customer base is extremely diversified due to our ability to fabricate in various plastics and other materials as well as design specialty print and web materials. With CAD, CNC, Metal Fabrication and Milling and Graphic Design capabilities, we can produce a multitude of products for our customers and vendors as well as support them with web and print resources.

ABOUT ASPIRE DESIGN

At Aspire Design we are a creative, highly motivated team dedicated to providing design, consultation and fabrication services. our goal is to supply the demand for artistic custom work. we are one of the few organizations in our area that not only designs, but also fabricates and manufactures our glass products all in one location.

We customize our work to suit the individual needs of our clientele while still maintaining the highest standard of craftsmanship. our creations are diverse, ranging in styles from traditional and classic to contemporary and modern. imagination, professionalism, and attention to detail are sources of great pride at aspire design.

By controlling the design, fabrication, and refinement process, our clientele receives artistic one of a kind "works" that combine both form and function. production in one location allows our clients to oversee their projects from concept to completion. aspire design offers estimating, designing, fabrication, field dimensioning, and installation of all our creations.

It is with satisfaction that we offer these services to the design community and the general public in an attempt to ease the process of custom fabrication.
