GALAXY STAR PANEL™

The Galaxy Sky Panel™ from Impact Lighting Inc. is the newest technology in digital star lighting. Admiring the night sky can be even more enjoyable indoors with the use of Galaxy Sky Panel™.

Provide your clients the ultimate effect in ceiling design with star clusters, firework display and shooting stars with the convenience of clean and simple installation.

Sparkling pin points of light appear through black acrylic panels. Star Panels can be customized by shape, size, quantity and patterns of of light per panels.

Unlimited selection of light patterns are available from a random spacing as in a star field to custom designs and pictures. Light can move, pulse, sequence or alternate to provide unique effects or can simply appear together. Panels may also be used in ceilings, walls for accent panels, limousines or other custom applications. Custom finishes to accent all color scenes. Custom sizes available. Special color effects can be achieved by using colored LEDs.

WE OFFER READY-TO-USE CEILING PANELS WITH YOUR CHOICE OF LED OR FIBER OPTICS ALREADY INSTALLED.
